

CSiXCAD v19.3.0 Release Notes

© 2022 Computers and Structures, Inc.

Notice Date: 12-October-2022

This document lists changes made to CSiXCAD since v19.2.0, released 14-June-2022. Items marked with an asterisk (*) in the first column are more significant.

External Import and Export

Enhancements Implemented

*	Ticket	Description
	8706	CSiXCAD is now compatible with ZWCAD 2023.

Installation and Licensing

Enhancements Implemented

*	Ticket	Description
	8824	A minor enhancement to the installation was implemented. The installer needs to register CSiXCAD with one or more compatible CAD products and is usually able to retrieve their executable locations from the Windows registry. In the rare instances where that fails, the installer now asks the user to select a CAD product and provide the path to its executable. Previously in such instances, the installation was cancelled and CSiXCAD was not installed. The new behavior is only available for normal interactive installation, not for silent installation deployed via a command line.
