

SAFE v23.3.0 Release Notes

© 2026 Computers and Structures, Inc.

Notice Date: 23-June-2026

This document lists changes made to SAFE since v23.2.0, released 24-February-2026. Items marked with an asterisk (*) in the first column are more significant.

Design – Slab

Enhancements Implemented

*	Ticket	Description
*	12017	An enhancement has been made to add concrete and PT slab design for CSA A23.3:2024 code.

Internal

Enhancements Implemented

*	Ticket	Description
	11867	The version number has been changed to v23.3.0 for a new intermediate release.

Results Display and Output

Incidents Resolved

*	Ticket	Description
	12191	An incident was resolved to correctly display the tables in the design report which used to be shown in the report tree but were missing in the report document.

Structural Model

Incidents Resolved

*	Ticket	Description
	12101	An incident was resolved where point spring properties (Define menu > Spring Properties > Point Springs) would create a separate internal nonlinear link element for the Quick Specification nonlinear options and for the links specified for the From Link Properties regardless which Nonlinear Specifications option was selected in the form. This behavior has been corrected so that the nonlinear link element created for the point spring will only reflect the selected Nonlinear Specifications option.
